Email address.....

I wish to reserve.....places on the above course.

This course has been specifically designed for Airsoft site, managers, marshals and is ideal for those who have a responsibility for Health & Safety matters on an Airsoft Site. The course runs over one day and is free to member sites. Normally this course would cost approx £150 per person and therefore represents a major saving for those sites who wish to comply with the training requirements as set out in the Management of Health & Safety at Work Regulations 1999. The course will enable those attending to identify areas of H&S needs specific to their own site.
